

# INSTRUCTIONS

## STEP 1.

*Colour-in the baubles - use your creativity and imagination! You can customise the designs as much or as little as you want. Use pencils, crayons, paint, pens... whatever you have to add some colour.*

## STEP 2.

*Cut out the paper baubles. Stick them onto card or cardboard to make sure they don't curl. Cut out the shapes from the cardboard or card.*

## STEP 3.

*Put a small hole in the loop at the top of each bauble. A hole punch works well for this.*

## STEP 4.

*Cut lengths of cotton and string - think about how long you want them to hang and do double this length. Thread your cotton / string through the hole and tie it closed with a knot or bow.*

## STEP 5.

*Hang the baubles from your tree or anywhere else you think needs a bit of festive decoration, and share a picture with us on social media! It will be a brilliant boost to the Christmas Spirit! (find us @xmasspiritofficial on Instagram, Facebook and TikTok)*

## **BONUS**

*If you want a double sided bauble design, print the paper template twice and stick these on the other side of the cardboard or card.*
